2. Citations and explanations (Rule 70.7)

The present invention relates to a method for extracting amygdalin from Persicae semen or Armeniacae semen with maximum yield, not only by minimizing the surface area of Persicae semen or Armeniacae semen but also by using the extraction solvent containing acid.

The following documents have been considered for the purpose of this report :

D1 = WO 96/20716 A1 (11. 07. 1996)

D2 = JP 58-113199 A (05. 07. 1983)

D1 discloses the method for extracting amygdalin from the deskinced apricot kernels or peach stone with water.

D2 discloses a method for preventing the racemization of amygdalins by maintaining the aqueous solution of amygdalins to the acidic condition.

Even though D1 and D2 are relevant to the present invention, none of them state that amygdalin could be extracted from Persicae semen or Armeniacae semen with maximum yield, not only by minimizing the surface area of Persicae semen or Armeniacae semen but also by using the extraction solvent containing acid.

As a consequence, claims 1-10 meet the criteria set out in PCT Article 33(2)-(4).
